The 45th American president will be a primary architect of new strategies and public policy addressing the ever-evolving challenges of terrorism. This scourge simultaneously operates secretly and publicly in multiple regions globally without regard to borders, accepted standards of warfare, or the tenets of the faiths its fighters say they promote. The traditional tools of military response, intelligence gathering, and homeland security measures have only been partially successful. Terrorism continues to spread to more and unexpected locations globally and in our midst. Some in America not only do not feel safe, they believe they have sacrificed many of their freedoms. As a specialist in both international terrorism and public policy development, Dr. McCuan offers some new and valuable insights.
