**Join this wide-ranging conversation with Dr. Richard Haass, President of the Council on Foreign Relations as together we analyze the global social structures that are necessary for effective problem solving and stability. Dr. Haass is one of the most articulate, thoughtful analysts in the U.S. regarding global affairs and American foreign policy. He will discuss how we can become more informed, discerning citizens through under-standing how the world works, how international acts impact us domestically and how we can help shape U.S. responses. Haass will also explain how he studies world events, global politics, financial shifts, cultural uprisings and ancient and modern history to make sound, independent judgments regarding events around the globe.**

**At the end, Dr. Haass will engage with the audience in a frank, lively Q and A about today's international challenges. Don't miss this unique opportunity to interact with one of the foremost experts of our day on global affairs!**
